

Cleaning and care products for nora® floorcoverings with «nora cleanguard®» surface recommended by the cleaning agent manufacturers.

The cleaning and care products listed in the table are **recommendations of the cleaning agent manufacturers** on the German market. Depending on the type of project/application, it may be appropriate to **deviate from the standard recommendations and use products and procedures according to the recommendations of the cleaning agent manufacturers**. Please observe the **product-specific manufacturer's instructions!** Suitable cleaning and care products of cleaning agent manufacturers which are not listed can of course also be used according to their recommendations.
